

Certificate of Completion: Fundamentals of Supply Chain Management (5 modules with Introduction)

Supply Chain Online, LLC offers a personalized certificate for readers who complete modules SCM102 through SCM106, covering Fundamentals of Supply Chain Management, with a passing test score (70% or higher) on each module. The total estimated study time for all required modules is approximately six to eight hours, comparable to one full day of instruction in a wide range of supply chain management topics.

The personalized certificate becomes available to the user as an electronic download (a PDF file) upon successful completion of the eligibility requirements (see above). Once all required tests have been passed, access to the certificate via our web site is immediate and readers can print their own hardcopy for their records. Along with the bearer's name, each certificate contains a verification code that can be used to verify the certificate's authenticity.

Once you have passed the required tests, there is no additional cost to obtain your certificate; simply select the "Certificate" link under "My Account" in our main navigation bar and click "Download".

Certificate Benefits:

- Provides written documentation that the reader has completed tests for modules SCM102 through SCM106 with scores of 70% or higher
- Certificate can be verified in real-time on the web by current/prospective employers with a special identification system that does not require certificate holders to provide their account information
- Available to both individual and corporate students at no additional charge beyond the cost of required modules

Required Modules:

SCM102: Supply Chain Strategies I: Efficiency and Cost Savings

SCM103: Supply Chain Strategies II: Responsiveness & Advanced Topics

SCM104: The Internet and Supply Chain Management

SCM105: Performance Measures for Supply Chain Management

SCM106: Product and Process Design for Supply Chain Management
